Trans. of a German language article from an unidentified source, 1960 (?)

DESCRIPTORS: *Textiles, Purification, *Fluorocarbons, *Polymers, Synthesis, Surface area, Synthetic fibers, Processing.

A series of synthesizing possibilities with fluorcarbon compounds are indicated in a thorough examination. Special requirements for their application in the textile field are discussed in connection with their physical surface area characteristics. The spot repellent characteristics are proved to be a combination effect due to the multivalent compounds, and the method of operation of fluorcarbon polymers applied in textile (Materials - Textiles, TT, v. 8, no. 5) (over)

With the few experimental facts which we have obtained over the past year in this field, we attempt to give a first glimpse as to what this field of technology may expect, in all probability, from fluorchemical treatment, and what it cannot expect. (Author)
